

## **Con Edison Returns Indian Point 2 To Service**

January 3, 2001

New York, N.Y. - Consolidated Edison Company of New York, Inc. (Con Edison) announced that its Indian Point 2 nuclear generating station resumed power operation at 2:14 a.m. today and is now connected to the company's electrical grid.

Con Edison recently completed the installation of four new steam generators following the development of a small crack in a tube of one of the four original steam generators. The restart follows months of extensive testing of plant systems. Nuclear Regulatory Commission staff have been on-site during the outage and have conducted numerous inspections and reviews. Last month, the company announced the sale of Indian Point 2 to the Entergy Corporation, and anticipates closing the deal by mid-2001.

Con Edison [NYSE: ED] is a subsidiary of Consolidated Edison, Inc., one of the nation's largest investor-owned energy companies, with approximately \$9 billion in annual revenues and \$16 billion in assets. The utility provides electric, gas and steam service to more than three million customers in New York City and Westchester County, New York.
