Con Edison, Inc.

Morningstar Conference – Management Behind the Moat November 7, 2013

Forward-Looking Statements

This presentation includes certain forward-looking statements intended to qualify for safe-harbor provisions of the Federal securities laws. Forward-looking statements are statements of future expectation and not facts. Words such as "expects," "estimates," "anticipates," "intends," "believes," "plans," "will" and similar expressions identify forward-looking statements. Forward-looking statements are based on information available at the time the statements are made, and accordingly speak only as of that time. Actual results might differ materially from those included in the forward-looking statements because of various factors including, but not limited to, those discussed in reports the company has filed with the Securities and Exchange Commission.

Non-GAAP Financial Measure

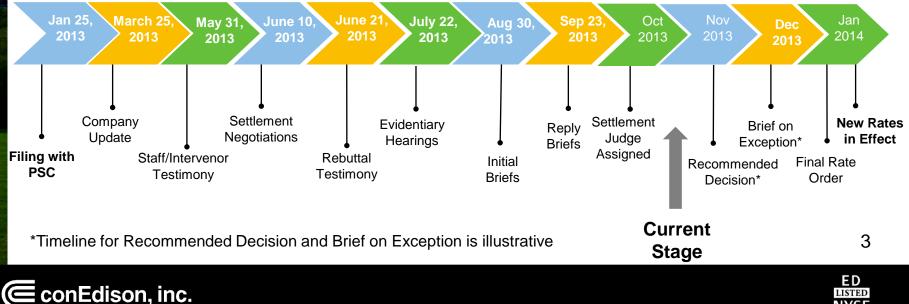

This presentation contains a financial measure, earnings from ongoing operations, not determined in accordance with Generally Accepted Accounting Principles (GAAP). Earnings from ongoing operations should not be considered as an alternative to net income. Management uses this non-GAAP measure to facilitate the analysis of the company's ongoing performance and believes that this non-GAAP measure also is useful and meaningful to investors. A reconciliation of this non-GAAP measure to earnings determined in accordance with GAAP is included as a part of this presentation.

Con Edison of New York 2013 Electric, Gas and Steam Rate Filings (13-E-0030, 13-G-0031, 13-S-0032)

- Historic test year: Twelve months ended June 30, 2012
- Forward test year: January 1, 2014 December 31, 2014
- New rates in effect January 1, 2014
- In October, the PSC extended rate setting process for an additional month to give parties time for potential settlement discussions. The extension is subject to a "make whole" provision
- Updated timeline for rate setting process:

NYSE

Consolidated Edison, Inc. Investment Thesis

- The largest of the few publicly-traded, T&D-focused utility companies
 - Limited commodity exposure
- Reduced regulatory lag
 - Forward-looking test years
 - Timely recovery of most fuel and commodity costs
 - Revenue decoupling mechanism in NY (electric and gas)
 - Adjustment mechanisms for several major uncontrollable expenses (e.g. pension)
- Significant dividend record
 - 39 consecutive years of dividend increases; 3rd longest in electric utility industry
 - 4.2% yield is 3rd highest among S&P 500 Dividend Aristocrats
- Ability to invest for customer benefit
 - Majority of investment is replacement and upgrade of existing assets
 - Growth opportunity through increased natural-gas conversions
 - Targeted energy efficiency and demand side management
 - Strong, stable balance sheet and conservatively managed liquidity

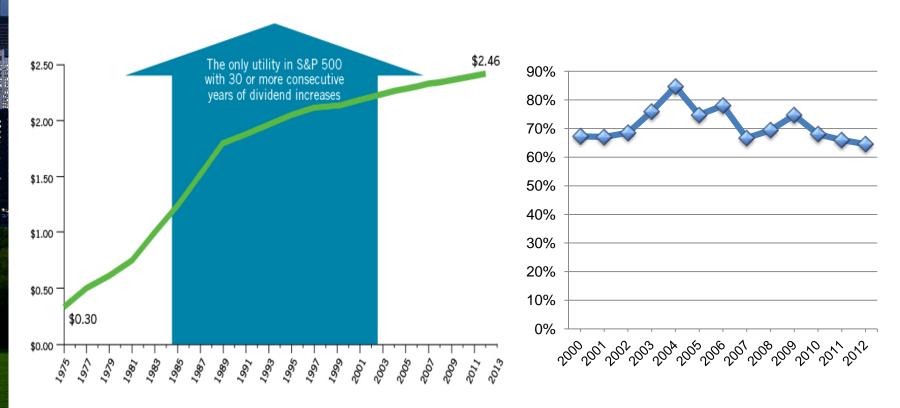

A Compelling Dividend Record: 39 Consecutive Years of Dividend Increases

Annualized Dividend 1975 - 2013

LISTED

Regulated Transmission and Distribution Focused

*Total reflects parent company expenses and consolidation adjustments amounting to \$(0.06) per share. Earnings include after-tax net mark-to-market gains of \$0.13.

NYSE

Regulated Utilities are the Core of Con Edison, Inc.

Con Edison of New York (CECONY)

- 3.3 million electric customers
- 1.1 million gas customers
- 1,717 steam customers
- 702 MW of regulated generation
- Delivered 40% of NYS 2013 electric peak consumption

Orange and Rockland (O&R)

- 303,000 electric customers
- 131,000 gas customers
- Delivered 3.4% of NYS 2013 electric peak consumption

CECONY and **O&R** delivered 43% of NYS 2013 electric peak consumption

7

conEdison, inc.

New York City Economy Continues to Show Resilience

- 60,700 jobs added in NYC during first 6 months of 2013 – highest rate of growth for any 6-month period since 2000
- NYC is becoming a high-tech hub with job growth and two science campuses under development
- Tourism is NYC's fifth largest industry with a record-breaking 52 million tourists in 2012

With projects underway like One World Trade Center, nearly half the nation's office space under construction is in NYC

conEdison, inc.

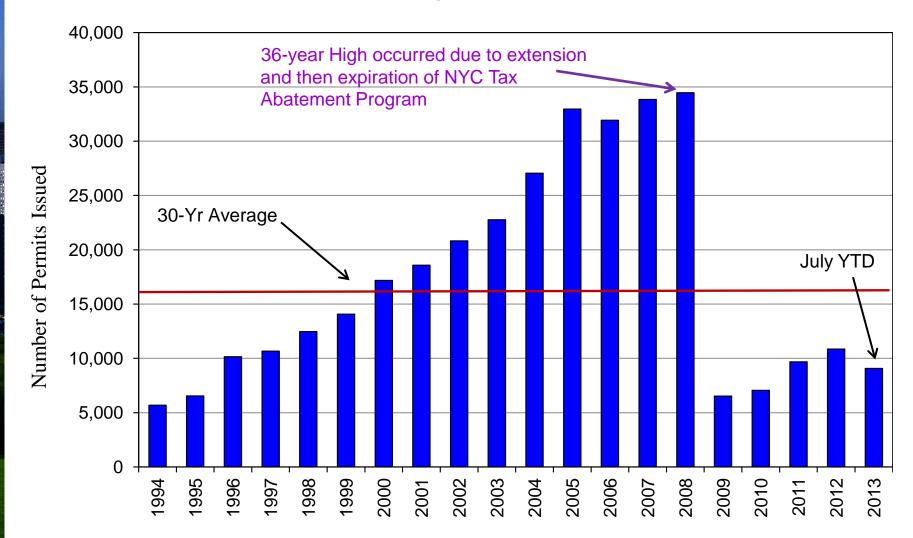

In December, ground was broken on a 26-acre, \$15 billion Hudson Yards development

- Municipal projects like the 2nd Avenue Subway and the 7-Line Extension to the Jacobs Javits Center will help to serve NYC's growing population
- Barclays Center home of the Nets and Islanders - officially opened in September 2012 in Downtown Brooklyn

NY PSC Staff's Discounted Cash Flow Model

• The Staff employs a dividend discount model.

Value =
$$\frac{D_1}{(1+R)} + \frac{D_2}{(1+R)^2} + \frac{D_3}{(1+R)^3} + \dots$$

- Solving for an equity return, R, where:
 - D₁ through D₄ = Value Line estimates
 - D_5 through D_{∞} = Value Line estimates based on future earnings retention and share growth
 - Value = average of prior three monthly high and low proxy group stock prices

NY PSC Staff's Capital Asset Pricing Model

• Staff solves for an equity return, R

$$\mathsf{R} = \mathsf{R}_{\mathsf{UST}} + (\mathsf{R}_{\mathsf{MKT}} - \mathsf{R}_{\mathsf{UST}})^*\beta$$

• Where:

- R_{UST} is the risk-free return: average of prior three monthly yields for 10-year and 30-year Treasuries
- R_{MKT} is the market rate of return: BofA Merrill Lynch's monthly Quantitative Profiles report (three month average)
- β is the risk of the individual share relative to that of the market: Value
 Line estimate for peer group

- (f) The rate plan provides for a one-time surcharge of \$31.7 million in Year 3
- (g) in Yr. 2, 10.31% 11.30%: 50/50, 11.31% 12.30%: 25/75, and >12.30%: 10/90. In Yr. 3, 10.41% 11.40%: 50/50, 11.41% 12.40%: 25/75, and >12.40%: 10/90
- (h) The rate plan provides for a one-time surcharge of \$4.3 million in Year 3

Con Edison of New York 2013 Electric, Gas and Steam Rate Filings (13-E-0030, 13-G-0031, 13-S-0032)

- Historic test year: Twelve months ended June 30, 2012
- Forward test year: January 1, 2014 December 31, 2014
- New rates in effect January 1, 2014
- In October, the PSC extended rate setting process for an additional month to give parties time for potential settlement discussions. The extension is subject to a "make whole" provision
- Updated timeline for rate setting process:

NYSE

Key Provisions of 2013 Electric, Steam and Gas Rate Filing

- Proposing programs intended to reduce service outages from major storms, as well as improve the storm recovery process
 - plans for \$1 billion of storm hardening capital expenditures through 2016 (electric: \$800 million; gas: \$100 million; steam \$100 million)
 - surcharge mechanism for future hardening programs.
- Proposing additional operating and capital programs, including programs to address new cyber security standards
- Proposing to recover deferred storm charges over three years (including \$243 million of response and restoration O&M costs for Sandy)
- Requesting the implementation of a storm reserve for the gas and steam systems
- Continuing the current provisions for true up of costs of pension and OPEBs, long-term debt, storms (electric), the impact of new laws, and environmental site investigation and remediation
- Continuing the revenue decoupling mechanism for electric and gas services
- Proposing implementation of weather normalization of revenues for steam
- Continuing provisions for recovery of cost of purchased power, gas, steam and fuel
- Requesting full reconciliation of property taxes and municipal infrastructure support costs

LISTED

NY Public Service Commission Response to NY Energy Highway Blueprint: New & Upgraded AC Transmission

Proceeding to examine proposals for AC transmission upgrades to address congestion on the transmission system between Utica and NYC (12-T-0502)

- Transmission projects proposed by NY Transco, NextEra, Boundless Energy and North American Transmission Corp.
- NY Transco filed a statement of intent proposing to build five projects valued at \$1.3 billion. Expected in-service time is between 2016 and 2019. For more information visit <u>http://www.nytransco.com/</u>
- PSC is conducting a single Article VII process to consider the proposed projects. NYTOs submitted application materials for the projects on October 1st

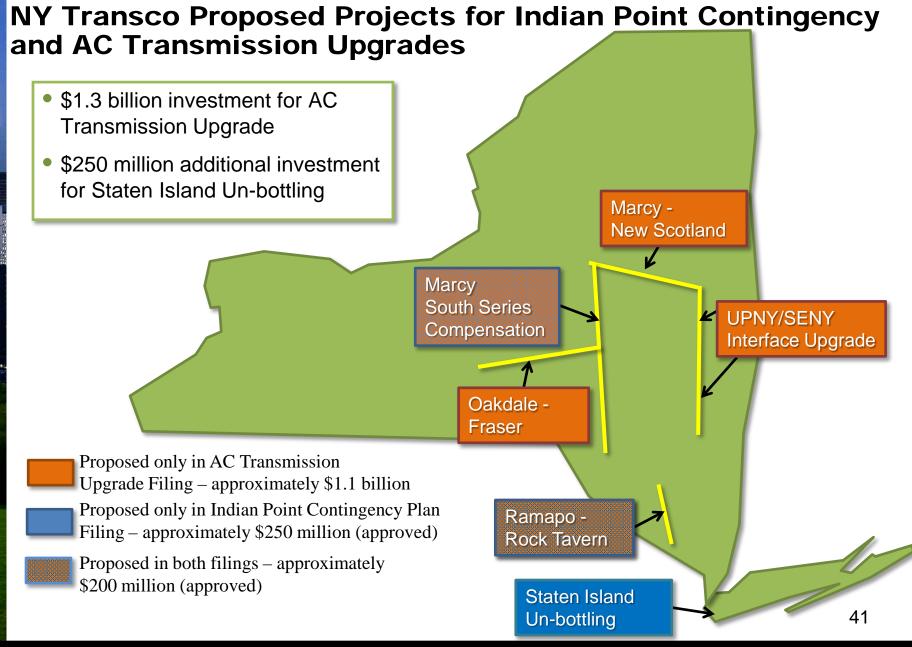

NY Public Service Commission Response to NY Energy Highway Blueprint: Indian Point Contingency

Proceeding soliciting Indian Point Contingency Plan (12-E-0503)

- Filed by ConEd and NYPA on February 1, 2013
- The plan included two parallel solution paths: a) Transmission Owner Transmission Solutions (TOTS) - three transmission projects (NY Transco projects) and b) an RFP process initiated by NYPA to consider generation and/or transmission alternatives proposed by developers
- In November, the PSC made the following decisions:
 - Approved construction of the TOTS projects: Ramapo-Rock Tavern, Staten Island Unbottling and Marcy South Series Compensation. The PSC supports FERC tariff cost recovery and cost allocation methodology proposed by NY Transco for the projects. Total cost of the TOTS projects is approximately \$450 million
 - Approved investment in demand response and energy efficiency programs to achieve 100 MW of demand reduction, plus a 25 MW of Combined Heat and Power (CHP) program
 - Decided to defer a decision on the NYPA RFP because of future market changes that could encourage market solutions including return to service of mothballed/retired generation
- The expected in-service date for approved TOTS projects and demand management programs is prior to summer 2016
